A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/4/10 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3 and 7-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kido, of record.

See the previous rejections over Kido. In addition, Kido discloses the inorganic material can be a metal oxide [0033]. New claims are rejected because the cathode metal of Kido is reflective because it is metal. Likewise the charge generation layer comprising the mixed metal oxide and organic material can be adjacent a light emitting layer. See for example figure 8.

Applicant's arguments filed 5/4/2010 have been fully considered but they are not persuasive. Applicant argues there is no metal oxide, but clearly Kido discloses metal oxide in paragraph [0033] and elsewhere. Likewise the charge generation layer can be adjacent the light emission layers as disclosed in figure 8.
